

**Our Customers
Look Good
on our
Cushion of Wood**

"We've been very pleased with the Novus 'Cushion' for our school's playground. At first, we were concerned about splinters, but the chips are soft and there's never been a problem. Not only has it provided a durable foundation, it has greatly added to the aesthetics and safety of our playground area." *Belinda Box, Principal, Deer Park Elementary, 1995.*

"We were extremely excited to have found the Novus 'Cushion' for our playground. We have tried other materials, but find the 'Cushion' much safer and easier to maintain. It is a softer surface and we don't have problems with children throwing rocks and sand." *Kenny Moore, Asst. Principal, Dabbs Elementary, 1995.*

"The children are having so much fun and the parents are greatly appreciative of the safe environment that you have created for their children to play. It is this kind of sincere assistance that helps to uplift the hearts of those who need it most." *Bob Pruett, Director, Star of Hope, 1997.*

THE NOVUS CUSHION OF WOOD

THE CUSHION OF WOOD ALLOWS CHILDREN
TO PLAY SAFELY ON A BED OF NATURAL FIBER

*This ideal surface for playgrounds, school yards, and park facilities is now available through our NOVUS Wood Processing Facilities located in Houston, Dallas, and Texarkana, Texas.
It is safe, inexpensive, easy to manage, and it always looks great!*

SAFE

The Novus Cushion of Wood is a safe and proven product which significantly absorbs impact better than most alternative surfaces. These wood chips create a soft fiber bed which has been tested and meets the shock absorbing standards set by the Consumer Product Safety Commission. It is also suitable for providing a stable surface for accessibility according to provisions in the "Americans with Disabilities Act".

INEXPENSIVE

The Novus Cushion will save you money. It seems the harder the surface, the more you pay. With the Cushion, the cost of the material and installation could be as much as 60% less than alternative surfaces.

EASY TO MANAGE

Handling the material is easy. Novus can deliver the 'Cushion' to your location in truckload quantities (20 to 110 cubic yards). You can even come by our facility and pick it up yourself. The installation can be performed by one person with no difficulty; and when the material is placed in the designated location, the wood chips are simply raked into place creating a soft cushion of wood.

ALWAYS LOOKS GREAT

Not only will the playground be simple to maintain, it will always have that great natural look. The Novus Cushion of Wood can be raked periodically; and by adding a small amount of our natural material, your playgrounds will always look their best.

THE ULTIMATE PLAYGROUND SURFACE
