

Municipal & Industrial On-Site Grinding Services

Municipalities, utilities, and industrial facilities all face disposal challenges with wood and brush debris. Novus addresses these issues with on-site turnkey grinding services. This economic alternative can save costs, reduce volume, produce a reusable material, and enhance environmental responsibility.

Brush & Land Clearing

Novus provides grinding services for brush and wood debris generated from land clearing. The mobile grinding units help reduce cleared vegetation to a manageable volume which minimizes transportation and disposal costs.

PROGRAM BENEFITS FOR MUNICIPALITIES, UTILITIES, AND INDUSTRIAL FACILITIES

- Transportation Savings
- Disposal Savings
- Generation of Organic Products
- Volume Reduction
- Enhanced Safety Features
- Enhanced Environmental Responsibility

For more information and a free site assessment, please contact our wood recycling group. Find out how reducing wood waste can benefit your facility, community, and the environment. Let Novus demonstrate how wood grinding services can be successful for you.

Organic Product Marketing

The organic products offered by Novus Wood Group, LP vary greatly. They include biomass fuel, landscaping products, erosion control, remediation, lumber products, playground surface, and unique industrial applications.

Cushion of Wood

Novus' "Cushion of Wood" is utilized in playgrounds throughout Texas. It allows children to play safely on a bed of natural fiber. This organic playground surface material is safe, easy to manage, inexpensive, and it always looks great.
